STATEWIDE CURRENT SITUATION: Texas A&M Forest Service (TAMFS) received one new request for assistance for wildfire suppression operations on Thursday, April 14. Elevated to critical fire weather conditions are forecasted for the Central and Southern High Plains today.

NWS Fire Weather Outlook Valid: 7AM 4/15 to 7AM 4/16.

Weather - Day 1 Fire Weather Outlook: ...CRITICAL FIRE WEATHER AREA FOR PARTS OF THE CENTRAL AND SOUTHERN HIGH PLAINS...

...Synopsis...

A midlevel speed maximum embedded within broad westerly flow will cross the central and southern Rockies today. In response, a lee surface low will develop near southeastern CO and the TX/OK Panhandles. The combination of very dry boundary-layer conditions and breezy surface winds will result in enhanced fire-weather conditions across parts of the central and southern High Plains today.

...Central and Southern High Plains...

00Z soundings across the central and southern High Plains show a very dry airmass already in place (10-15 percent RH), with poor overnight recoveries expected. Downslope warming/drying accompanying the midlevel speed maximum combined with diurnal heating/mixing will result in widespread 10-20 percent RH across the central and southern High Plains. At the same time, a tightening pressure gradient peripheral to the developing lee surface low will favor 15-25 mph sustained westerly surface winds. The strongest winds are expected in the immediate lee of the central and southern Rockies, where Critical highlights have been added. Fuels across the region remain very dry (ERCs in the 90th-95th percentile), which will further exacerbate the wildfire-spread threat.

On April 12, Governor Abbott directed the Texas Division of Emergency Management (TDEM) to prepare additional state resources for mobilization as Texans face critical-to-extreme wildfire weather conditions in the Western half of the state and severe storm threats in the Eastern half of the state. The Texas State Emergency Operations Center (SOC) is operating at Level II: Escalated Response in support of severe weather and wildfire response.

According to the Texas A&M Forest Service (TAMFS), a Southern Plains Wildfire Outbreak is possible, April 12, in the Texas Panhandle. This event may impact communities near Canadian, Amarillo, Childress, Lubbock, and Midland where extremely dry vegetation will be subjected to above normal temperatures, low humidity, and high wind speeds. A heightened threat of fire danger through Wednesday includes the Panhandle, South Plains, Permian Basin, West Texas, Big Country, Concho Valley, Texoma, and the Border Region.

TAMFS has activated more than 325 state firefighters, 175 local firefighters from 56 different departments through the Texas Intrastate Fire Mutual Aid System (TIFMAS) including 45 engines and has called in more than 100 firefighters from 12 states. TAMFS is utilizing more than 35 aviation resources including 3 large airtankers, 15 single engine air tankers, six air attack platforms, and five type 1 helicopters.

On April 1, Governor Abbott amended the Disaster Declaration, adding Andrews, Aransas, Archer, Bee, Bell, Borden, Bosque, Brewster, Cameron, Coke, Concho, Cooke, Crane, Crockett, Culberson, Dawson, Dimmit, Duval, Ector, Edwards,

Gaines, Garza, Hemphill, Hidalgo, Howard, Hudspeth, Jeff Davis, Jim Hogg, Jim Wells, Kenedy, Kimble, Kleberg, Live Oak, Martin, Maverick, McCulloch, Menard, Midland, Nueces, Palo Pinto, Parker, Pecos, Presidio, Reagan, Real, Refugio, Roberts, Terrell, Tom Green, Upton, Wichita, Willacy, Winkler, Wise, Zapata, and Zavala counties.

On March 29, Governor Abbott encouraged Texans to remain vigilant and informed on weather conditions as fire danger and severe weather threaten the state.
